STATUS OF STATE PACE PROGRAMS

As of January 2016, 28 states have state-level purchase of agricultural conservation easement (PACE) programs. Three states—Arizona, Georgia and Missouri—have authorized PACE but do not yet have programs. Montana had a state-level program that was discontinued in 2003 when state authorization expired. This table displays the status and summarizes important information about farm and ranch land protection programs in 29 states that have funded easement acquisitions. For a program to be included, the protection of agricultural lands must be one of its core purposes, accomplished primarily by compensating landowners for the value of the easement.

Some programs (e.g., Delaware and Massachusetts) purchase and hold easements directly. Others have the authority to acquire and co-hold easements with partners (e.g., county governments). Some programs (e.g., New York and Virginia) only provide grants to eligible entities, such as local governments and land trusts, to buy easements.

Explanation of Column Headings

Year of Inception/Year of First Acquisition

"Year of Inception" is the year in which the PACE program was authorized. "Year of First Acquisition" is the year in which the program acquired its first easement.

Easements or Restrictions Acquired

Number of agricultural conservation easements or conservation restrictions acquired through the program. This number does not necessarily reflect the total number of farms/ranches protected because some programs acquire a property in stages and/or may hold multiple easements on the same farm/ranch. Some programs do not hold easements but instead provide funds for easement purchases to local governments or land trusts.

Acres Protected

Number of acres protected by the program.

Land in Farms

Acres of land in farms as reported in the 2012 Census of Agriculture released by the United States Department of Agriculture's National Agricultural Statistics Service (USDA NASS).

For the purposes of the Census of Agriculture, USDA NASS defines a "farm" as any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.

Program Funds Spent to Date

Dollars spent by each program to acquire easements on farms/ranches. This amount may include unspent funds dedicated for installment payments on completed projects. Unless otherwise noted, these figures do not reflect incidental land acquisition costs, such as appraisals, insurance and recording fees, or the administrative costs of running the program. These figures do not include additional funds

FARMLAND INFORMATION CENTER

CONTINUED FROM PAGE 1

contributed by federal programs, local governments (counties and municipalities), private land trusts, foundations and/or individuals.

Additional Funds Spent to Date

Funds contributed toward state program acquisitions by federal programs, local governments, private land trusts, foundations and/or individuals (see "Funding Sources Used to Date").

Program Funds Available

Program funds available for the current fiscal year to acquire easements on agricultural land.

Program Funds Available Per Capita

Program funds available per capita are based on state population estimates for 2015 from the U.S. Census Bureau.

Outstanding Applications

Backlog of applications reported by program administrators.

Funding Sources Used to Date

Sources of funding for each program. "Transportation funding" refers to federal money disbursed under The Moving Ahead for Progress in the 21st Century Act and its predecessors for "transportation enhancements." Easement acquisitions that protect scenic views and historic sites along transportation routes were eligible for these funds prior to 2012.

The Army Compatible Use Buffer (ACUB) Program provides funds to establish easement-protected buffer areas around military installations.

The federal Coastal Impact Assistance Program authorizes funds to be distributed to oil and gas producing states to mitigate the impacts of oil and gas extraction from the continental shelf.

The Agricultural Conservation Easement Program (ACEP) protects agricultural land and conserves wetlands. It consolidates the Farm and Ranch Lands Protection Program (FRPP), the Grassland Reserve Program (GRP) and the Wetlands Reserve Program (WRP). The Agricultural Land Easements (ALE) component of ACEP provides matching funds to eligible entities to buy conservation easments on farm and ranch land. In the table, ACEP-ALE includes FRPP.

In addition to these sources of funding, several programs reported contributions from private sources.

NOTES

- Δ Program activity includes fee simple acquisitions of agricultural land. Great Outdoors Colorado grant recipients are required to resell land acquired in fee subject to a conservation easement.
- ^ "Program Funds Spent to Date" includes incidental land acquisition costs and/or personnel costs.
- x Program has terminated or is no longer acquiring agricultural conservation easements.
- ~ Figures are carried forward from previous PACE tables.
- "Program Funds Available" includes money for other land conservation purposes.
- ‡ Total includes 14 easements, 3,000 acres and \$1.5 million of additional funds spent that were credited to the Southern Ohio Tobacco Agricultural Easement Program (SOTAEP). SOTAEP was a onetime partnership between the Ohio Department of Agriculture, Southern Ohio Agricultural and Community Development Foundation and five local Soil and Water Conservation Districts. The Ohio Department of Agriculture currently administers these easements. In prior years SOTAEP's activity was represented separately on this table.

© September 2016

For more information on PACE, see the Purchase of Agricultural Easements fact sheet and other PACE resources on the Farmland Information Center (FIC) website. The FIC is a clearinghouse for information about farmland protection and stewardship. The FIC is a public/private partnership between the USDA Natural Resources Conservation Service and American Farmland Trust.
